

Recruiting Research Participants

Share Your Experience of Recovery and Support After Breast Cancer Treatment

Many women experience emotional changes, stress, daily life adjustment, and challenges in seeking support after completing primary breast cancer treatment. By listening to your story, we hope to better understand the experiences and needs of Chinese immigrant women at this stage, and help inform future recovery and support services.

Study Details

Who can take part?

- Aged 18 years or older
- Women of Chinese background
- Born in mainland China, Hong Kong, Macau, or Taiwan
- Later moved to New Zealand
- Currently living in New Zealand
